

## COVID-19 Testing FAQs

### Florida A&M University

#### *Where & when will the testing take place?*

The Curative COVID-19 testing site will be at Bragg Stadium on the campus of Florida A&M University. It will support the deployment of the Abbott BinaxNOW rapid COVID-19 antigen test. Curative will supply 700 rapid COVID-19 antigen tests per day between 9 am and 6 pm, Monday - Saturday.

#### *How is the testing conducted?*

The rapid COVID-19 antigen test sample is collected by a healthcare worker who will gently swab the inside of a patient's nostrils. This collection process is quick, easy, and comfortable.

#### *Is testing free? Is insurance required?*

Testing is free and open to the public, with no cost to the patient. Appointments and walk-ups are accepted. Physician referral or insurance is NOT required.

#### *How do I get my results?*

Patients receive their rapid COVID-19 antigen results within 1 hour of testing by email or SMS text. Public health departments also receive patient results and will contact patients with positive results.

#### *What happens after I get my results?*

Patients who receive a negative result from the rapid COVID-19 antigen test, but are suspected to be COVID-19 positive, are eligible for additional screening through Curative's RT-PCR molecular test. The Curative RT-PCR molecular COVID-19 test is a self-collected, painless, oral fluid test swab that provides patient results within 48 hours.

#### *What if I have additional questions regarding my results?*

The Curative Support team is glad to help patients with inquiries about their results. The team is available at [curativesupport@curative.com](mailto:curativesupport@curative.com) and 888-702-9042. More info available at [curative.com](https://www.curative.com).
